

ValidationException.java

```
package com.harisudhan.harisudhanmart.exception;

/** Thrown by service methods when input fails validation. Servlets map this to HTTP 400. */
public class ValidationException extends Exception {

    private final String fieldErrorCode;

    public ValidationException(String message) {
        super(message);
        this.fieldErrorCode = "VALIDATION_ERROR";
    }

    public ValidationException(String fieldErrorCode, String message) {
        super(message);
        this.fieldErrorCode = fieldErrorCode;
    }

    public String getFieldErrorCode() {
        return fieldErrorCode;
    }
}
```
